## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by 2003/0088527 to Hung et al.
- 3. regarding to claimed invention(claims 1 and 12), Hung et al teaches computer-implemented system for estimating water consumption for a facility (abstract, lines 1-4), the system comprising one or more computers operably programmed and configured to:

  (i) receive input defining a plurality of values or characteristics for one or more water-consuming operations within the facility (such as figures 5 and 9) and paragraph [0028], lines 1-9), (ii) estimate and output an annual water consumption for each of the water-consuming operations based on the plurality of values or characteristics (such as figure 9 and paragraph [0033]), and (iii) automatically create and display a water balance for the facility based on the annual water consumption for each of the water-consuming operations (such as figure 9 element 178 for predicting usage for calendar year).

  Regarding claim 2, wherein the one or more computers are additionally operably programmed and configured to display a calculator for estimating and outputting the

Art Unit: 2142

annual water consumption for one or more of the water-consuming operations (see figure 1).

Regarding claims 3-10, wherein water consuming operation includes various operations as claimed. Hung et al discloses the server 50 that can acquire water usage information from a stem process computer 62 or other metering device, monitoring a steam generating plant or processor as well as water usage information 66 may be flowing along a water main into an industrial plant or into a residence or parcel/field/operation of a farm, see paragraph {0024}, [0025], lines 1-16).

Regarding claim 11, wherein the one or more computers are additionally operably programmed and configured to display a calculator for estimating and outputting the cost for annual facility water consumption (see figure 9, element 174 and 176).

Regarding claims 13-23, claimed subject matter is similar to claims 2-12, and are rejected for the similar reasoning.

## Response to Arguments

4. Applicant's arguments with respect to claims 1-23 have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kamini S. Shah whose telephone number is 571-272-2279. The examiner can normally be reached on IFP.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal B. Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
